

Dear Students,

due to the continuing closure of the University, the School of Science and Engineering Council met on April 22, 2020 and made the following deliberations.

SUMMER SESSION FINAL EXAMS

- will be carried out online using the Moodle system, or else other platforms chosen by the individual professor
- may be either written or oral. However, it is important to note that due to the difficulties in conducting written exams many professors will likely prefer oral exams.

TEACHING PLAN

The presentation has been postponed to June 20, 2020.

LABORATORIES AND INTERNSHIPS

All in-person activity at Ca' Vignal 1 and 2 has been suspended until the University establishes its Phase 2 guidelines for the Corona Virus emergency.

Students who are scheduled to graduate during the summer session should contact their Academic Tutor to verify that they have or have not completed the requirements for graduation as stipulated in their academic plan and, if necessary, to organise additional work, carried out online, to replace what has not yet been completed.

ACTIVATION OF NEW INTERNSHIPS

Activation of a new internship, either at the University or externally, is permitted but only as "smart working" and only for students who expect to graduate during either the July or October (2020) sessions.

LAUREA SESSIONS

For the entire summer session thesis presentations will be made exclusively electronically, via the Internet.

GRADUATION CERIMONIES

Upon the return to normal activity, the School will organise graduation ceremonies for those that graduated during the March and summer sessions.

Considering the current state of emergency, professors will be able to handle special requests and particularly difficult situations, on an individual basis.

Verona, April 27, 2020

The Council President
